SECTION SF 30 BLOCK 14 CONTINUATION PAGE

A. The purpose of this amendment is to answer offerors' questions, to make changes to the RFP and to change the closing date for price proposals.

1a. Question on C14.5.4: The paragraph states that the *Athena System* Chief Engineer must have a USCG license as Chief Engineer (Limited) on Ocean waters for Motor Vessels of 5,000 horsepower. Will the Government accept a designated duty engineer license (Unlimited), on any waters, for vessels of any horsepower in lieu of the above-specified Chief Engineer license? The rationale for this is that 46 CFR (edition 10/01/2000), paragraph (a) states: "A designated duty engineer license authorizes service as chief or assistant engineer on vessels of not more than 500 gross tons in the following manner: (2) A designated duty engineer with no horsepower limitations may serve on any waters." The *Athena System* vessels are 250 gross tons, so a person with a designated duty engineer (Unlimited) license with no horsepower limitations may serve on any waters aboard an *Athena System* vessel.

1b. Question on C14.5.4: During the site visit a question was asked if the DDE Unlimited license could be substituted for the license required for the Chief Engineers on the ATHENA. The court reporter notes indicate that MSC was going to look into the matter and respond. Have you had an opportunity to look into this matter and if yes what is your decision? Please Advise.

Answer: C 14.5.4 requires at a minimum a licensed USCG Chief Engineer (Limited) on Ocean waters for Motor vessels of 5000 horsepower. The Designated Duty Engineer (unlimited) does not meet the license requirements of C 14.5.4.

2a. Question on TE-17: Paint is considered a consumable. Pls provide a paint schedule for each craft type, including manufacturer, color and formula number. (Justification: Alkyd paint is less expensive than epoxy/polyurethane paint. We need to know what to price).

2b. Question on TE-17: Paint, primer and associated paint chemicals are listed as consumable items. Since the Maintenance/Appearance sections of the draft RFP describe only general conditions, they are subject to interpretive judgement. We request that the paint, primer and associated paint chemicals used for preservation be reimbursable or the number of full paintings for each vessel be specified for costing purposes?

2c. Question on TE-17: Technical Exhibit 17 specifically states that tools and galley equipment are not consumables, however they appear, along with Miscellaneous Ships Equipment within the listing of items in Exhibit 17. Please clarify.

Answer: Technical Exhibit 17 is changed below. Paint and associated supplies / chemicals are consumables when used for touchup painting necessary to maintain the integrity of the coating systems. Paint and associated supplies / chemicals required during depot level maintenance will be included in the reimbursable costs.

3. Question on C14.6.7: What are the requirements of the 3rd Class Swim Test?

Answer: The requirements for the 3rd Class Swim Test are as follows:

- 1) Enter the water feet first from a minimum height of 5 feet.*
- 2) Remain afloat for 5 minutes.*
- 3) Swim 50 yards using any stroke*

B. The following changes are made to the RFP:

Box 9: Technical Offers will be received until 15:00 hours local time 9 July 2001.
Price Proposals will be received until 15:00 hours local time 13 July 2001

Section C Changes

C14.6.7 Add the following sentence to the end of the Article:

"The requirements of the 3rd Class Swim Test are as follows:

- 1) Enter the water feet first from a minimum height of 5 feet;*
- 2) Remain afloat for 5 minutes;*
- 3) Swim 50 yards using any stroke."*

Section F Changes

F2.1 Change the last citation in the paragraph from "(Section 3.9)" to "(Section C11.2)"

Changes to Technical Exhibits

TE-17 is deleted in its entirety and replaced as attached.

C. All other terms and conditions remain unchanged and in full force and effect.
